

## **Sustainability Policy Coral Sea Hotels and Resorts**

At Coral Sea Resorts Sharm El Sheikh, we are proud that our hotels care for the environment especially the underwater coral life. We believe in the protection, preservation and enhancement of our whole environment, through sustainable management. We reduce, minimise and manage the impact on the environment by our commitment to the following: We are continuously committed to:

- Set sound environmental objectives and targets. The environmental manager manages a review process, measuring results and reporting on achievements to senior management. This is done, at least, biannually.
- Comply with all applicable environmental law, legislation and regulations to ensure that current legislation is enforced throughout the hotel.
- To reduce our negative impact and conserve our natural resources, by way of education/training, and communication.
- Minimise pollution, by reducing the use of chemicals and other hazardous substances.
- We aim to minimise water consumption, energy, and waste production.
- Raise the environmental awareness of our employees, customers, suppliers and the local community by making them aware of our Environmental Policies, and encouraging them to adopt the same.
- Purchase local products and services where possible, and feasible, in accordance with our "Environmental Purchasing Policy".
- To ensure minimisation of the business impact, we apply do and don't, in accordance with the "Guidelines Best Travelife Practices".
- We will always seek to achieve a clean, healthy, safe and sustainable environment for our community, for tourism's future generations and ourselves.

**Thank you.**
